## TOURNAMENT PLAY REFERENCE GUIDE

### PUSH/FOLD CHARTS

---

Push/fold charts are pre-calculated hand ranges that tell you which hands to move all-in with from each table position when your stack reaches 15 big blinds or less in a poker tournament. They eliminate guesswork from one of the most misplayed phases in tournaments.

I have used these charts to help thousands of students identify one of the most costly short-stack leaks in the game, whether shoving too wide because they feel desperate, or folding hands that should be profitable shoves out of fear of going all-in.

### WHAT YOU'LL GET

---

### HOW TO USE PUSH/FOLD CHARTS

---

In my experience reviewing thousands of tournament hands, the single most common short-stack mistake I see is failing to use push/fold ranges at all. Players either shove too wide because they feel like they are going to bust anyway, or they tighten up drastically because they are afraid to go all-in and get called. Both approaches cost significant EV over the long run.

When your chip stack dwindles to 15 big blinds or less, you are in a position to optimally move all-in preflop if you happen to have a strong enough hand in the right position. Despite the fact that push/fold charts incorporate putting your entire stack at risk, the preflop concepts behind such charts are no different from those you would adhere to in any other poker hand.

Your position at the poker table and its impact on your hand selection are basic principles most poker players reference. The later your position preflop, the wider your raising range — almost every poker player knows this. Push/fold charts lean heavily on this concept, with the added stipulation that you either go all-in or fold.
